1 November 2026

To whom it may concern,

I write to confirm the following details of Parth Chapper's work with Career Horizons. I am the CEO and Founder of Career Horizons, and I am Parth's mother.

Parth has worked with Career Horizons for the past two years. During that time, he built the testing application that the company uses to deliver its tests.

Approximately 5,000 people have taken tests on the platform. It is used by three schools, as well as by many independent students.

The platform has generated approximately USD 100,000 in revenue for Career Horizons.

The AI-generated reports on the platform were Parth's idea. He proposed them to the company, and we adopted his proposal. Reports are now generated automatically when a student completes a test.

These details can be verified by contacting Career Horizons at mycareerhorizons@gmail.com or on +971 52 30 89792.

Yours faithfully,

Tripti Chapper
CEO and Founder
